|----------------------|--------------------------------|
| Student Name: | Logan Balfour |
| Assignment: | 222 |
| Graded On: | September 23, 2025 at 10:18 PM |
| Final Score: | 30.4 / 37.5 points (81.1%) |

Score Summary

Overall Performance: Good (81.1%)

Component Scores:

- Data Import Assessment: 3.8 points
- Missing Value Identification: 3.3 points
- Missing Value Treatment: 3.3 points
- Outlier Detection: 5.0 points
- Outlier Treatment: 2.5 points
- Methodology Justification: 5.0 points
- Reflection Questions: 5.0 points
- Code Documentation: 2.5 points

Performance by Category

- Satisfactory **Data Import Assessment:** 3.8/5 points (75%)
- Needs Work **Missing Value Identification:** 3.3/5 points (67%)
- Needs Work **Missing Value Treatment:** 3.3/5 points (67%)
- Excellent **Outlier Detection:** 5.0/5 points (100%)
- Needs Work **Outlier Treatment:** 2.5/5 points (50%)
- Excellent **Methodology Justification:** 5.0/5 points (100%)
- Needs Work **Reflection Questions:** 5.0/12.5 points (40%)
- Needs Work **Code Documentation:** 2.5/5 points (50%)

Reflection Questions Feedback

Next Steps

Good Job! (30.4/37.5 points - 81.1%) You're learning the fundamentals well. With some attention to the details below, you'll be ready for more advanced analysis. Here's what to focus on for next time:
Working Directory: Run your ``getwd()`` command and make sure you can see the output. You need to

know where R is looking for your files. Package Loading: Check that both ``tidyverse`` and ``readxl`` load without errors. If you get error messages, you might need to install them first. Data Import: Make sure all three datasets (`sales_df`, `ratings_df`, `comments_df`) load successfully. Pay attention to file paths and sheet names for the Excel file. Data Inspection: Run ``head()``, ``str()``, and ``summary()`` on each dataset. Make sure you can see the outputs - this tells you what your data actually looks like. Reflection Questions: Good start, but go deeper. Connect what you observe to business implications. What would these data patterns mean for real decision-making? Keep this up. You're developing the analytical thinking that employers value.

Study Tips:

- Good foundation! Focus on providing more detailed explanations in reflection questions
- Practice connecting technical concepts to business applications
