# **Homework Grading Report**

Student Name:	Gavin Lara
Assignment:	222
Graded On:	September 23, 2025 at 10:18 PM
Final Score:	32.1 / 37.5 points (85.6%)

## **Score Summary**

**Overall Performance:** Good (85.6%)

#### **Component Scores:**

• Data Import Assessment: 3.8 points

• Missing Value Identification: 5.0 points

· Missing Value Treatment: 3.3 points

• Outlier Detection: 5.0 points

• Outlier Treatment: 2.5 points

• Methodology Justification: 5.0 points

• Reflection Questions: 5.0 points

Code Documentation: 2.5 points

## **Performance by Category**

■■ Satisfactory **Data Import Assessment:** 3.8/5 points (75%)

■ Excellent Missing Value Identification: 5.0/5 points (100%)

■ Needs Work Missing Value Treatment: 3.3/5 points (67%)

■ Excellent Outlier Detection: 5.0/5 points (100%)

■ Needs Work **Outlier Treatment:** 2.5/5 points (50%)

■ Excellent **Methodology Justification:** 5.0/5 points (100%)

■ Needs Work **Reflection Questions:** 5.0/12.5 points (40%)

■ Needs Work Code Documentation: 2.5/5 points (50%)

#### **Reflection Questions Feedback**

## **Next Steps**

Good Job! (32.1/37.5 points - 85.6%) Strong work! You're getting comfortable with R and starting to think analytically about data. Your technical execution is solid. Here's what to focus on for next time: Working Directory: Run your `getwd()` command and make sure you can see the output. You need to

know where R is looking for your files. Package Loading: Check that both `tidyverse` and `readxl` load without errors. If you get error messages, you might need to install them first. Data Import: Make sure all three datasets (sales\_df, ratings\_df, comments\_df) load successfully. Pay attention to file paths and sheet names for the Excel file. Data Inspection: Run `head()`, `str()`, and `summary()` on each dataset. Make sure you can see the outputs - this tells you what your data actually looks like. Reflection Questions: Good start, but go deeper. Connect what you observe to business implications. What would these data patterns mean for real decision-making? Keep this up. You're developing the analytical thinking that employers value.

### **Study Tips:**

- Excellent work! Consider exploring additional data analysis techniques
- Try applying these concepts to your own datasets
