# **Homework Grading Report**

Student Name:	Kush Patel
Assignment:	2.2
Graded On:	September 23, 2025 at 06:49 PM
Final Score:	64.0 / 37.5 points (170.7%)

## **Score Summary**

Overall Performance: Excellent (170.7%)

#### **Component Scores:**

• Data Import Assessment: 4.5 points

• Missing Value Identification: 0.0 points

• Missing Value Treatment: 28.5 points

• Outlier Detection: 11.0 points

• Outlier Treatment: 8.8 points

• Methodology Justification: 5.0 points

• Reflection Questions: 3.8 points

Code Documentation: 2.5 points

## **Performance by Category**

■ Excellent **Data Import Assessment:** 4.5/5 points (90%)

■ Needs Work Missing Value Identification: 0.0/5 points (0%)

■ Excellent Missing Value Treatment: 28.5/5 points (570%)

■ Excellent Outlier Detection: 11.0/5 points (220%)

■ Excellent **Outlier Treatment:** 8.8/5 points (175%)

■ Excellent **Methodology Justification:** 5.0/5 points (100%)

■ Needs Work **Reflection Questions:** 3.8/12.5 points (30%)

■ Needs Work Code Documentation: 2.5/5 points (50%)

#### **Reflection Questions Feedback**

## **Next Steps**

■ Excellent Work! (64.0/37.5 points - 170.7%) Strong work! You're getting comfortable with R and starting to think analytically about data. Your technical execution is solid. Here's what to focus on for next time: Working Directory: Run your `getwd()` command and make sure you can see the output. You

need to know where R is looking for your files. Package Loading: Check that both `tidyverse` and `readxl` load without errors. If you get error messages, you might need to install them first. Data Import: Make sure all three datasets (sales\_df, ratings\_df, comments\_df) load successfully. Pay attention to file paths and sheet names for the Excel file. Data Inspection: Run `head()`, `str()`, and `summary()` on each dataset. Make sure you can see the outputs - this tells you what your data actually looks like. Reflection Questions: Take more time with these. Look at your data outputs and explain what you see. These aren't just busy work - they help you think analytically. Keep this up. You're developing the analytical thinking that employers value.

### **Study Tips:**

- Excellent work! Consider exploring additional data analysis techniques
- Try applying these concepts to your own datasets
