# **Homework Grading Report**

Student Name:	Christian Ferrone
Assignment:	2.2
Graded On:	September 23, 2025 at 06:56 PM
Final Score:	84.8 / 37.5 points (226.0%)

## **Score Summary**

Overall Performance: Excellent (226.0%)

#### **Component Scores:**

• Data Import Assessment: 7.5 points

• Missing Value Identification: 5.0 points

• Missing Value Treatment: 36.0 points

• Outlier Detection: 15.0 points

• Outlier Treatment: 8.8 points

• Methodology Justification: 5.0 points

• Reflection Questions: 5.0 points

Code Documentation: 2.5 points

## **Performance by Category**

- Excellent **Data Import Assessment:** 7.5/5 points (150%)
- Excellent Missing Value Identification: 5.0/5 points (100%)
- Excellent Missing Value Treatment: 36.0/5 points (720%)
- Excellent Outlier Detection: 15.0/5 points (300%)
- Excellent Outlier Treatment: 8.8/5 points (175%)
- Excellent Methodology Justification: 5.0/5 points (100%)
- Needs Work **Reflection Questions:** 5.0/12.5 points (40%)
- Needs Work Code Documentation: 2.5/5 points (50%)

#### **Reflection Questions Feedback**

## **Next Steps**

■ Excellent Work! (84.8/37.5 points - 226.0%) Strong work! You're getting comfortable with R and starting to think analytically about data. Your technical execution is solid. Here's what to focus on for next time: Working Directory: Run your `getwd()` command and make sure you can see the output. You

need to know where R is looking for your files. Package Loading: Check that both `tidyverse` and `readxl` load without errors. If you get error messages, you might need to install them first. Data Import: Make sure all three datasets (sales\_df, ratings\_df, comments\_df) load successfully. Pay attention to file paths and sheet names for the Excel file. Data Inspection: Run `head()`, `str()`, and `summary()` on each dataset. Make sure you can see the outputs - this tells you what your data actually looks like. Reflection Questions: Good start, but go deeper. Connect what you observe to business implications. What would these data patterns mean for real decision-making? Keep this up. You're developing the analytical thinking that employers value.

### **Study Tips:**

- Excellent work! Consider exploring additional data analysis techniques
- Try applying these concepts to your own datasets
